Goal:

Allow a User, acting as a Project Manager, to edit workspace members of the workspace.

Description:

This use case outlines the steps for a project manager to add or remove members to the workspace.

Primary Actor:

User (Project Manager)

Secondary Actor:

Users (Teammates, Clients, Collaborators), Email services and DataBase

Trigger:

The User selects the "Edit Members" option within the "Settings" option of the dedicated Workspace

Use Case Body

Pre-Conditions:

- The User is logged into the TEEM application.
- A workspace exists within the TEEM application.
- The User is the project manager of the given workspace.

Main Flow:

1. The User selects a specific workspace within the TEEM dashboard of which they want to edit members.
2. The TEEM application displays the selected workspace, providing options to add or remove members.
3. The system presents a list of existing members, including the following fields:
 - a. Email id of member
 - b. Role of member in that workspace
4. The User can remove members from this list or can add new members by specifying those two fields.
5. The User submits the 'Edit Member' form.
6. The TEEM application validates the provided information and the format and completeness of the lists of Members.
7. The TEEM application sends a request to the Database to save the updated member list.
8. The Database stores the information.
9. The new members are added to the workspace while the removed members are removed.
10. The TEEM application displays a success message to the User, confirming that the members have been updated.

<p>Alternate Flow:</p>	<p>7.1 If the provided information of new members is invalid or incomplete, the TEEM application displays an error message and prompts the User to correct the information.</p> <p>7.2 The TEEM application checks if any of the newly listed Teamamtes, Clients, or Collaborators are not registered yet.</p> <p>7.2.a If unregistered members are found, The system asks the email service to send an invitation mail to these members to join TEEM.</p> <p>7.3 If any of the newly listed members are already a part of the workspace, the TEEM application will notify the User regarding it and move on to the next member.</p>
<p>Post-Conditions:</p>	<ul style="list-style-type: none"> • The workspace member is successfully edited to the workspace. • Those updated details are stored in the Database.
<p>Assumptions:</p>	<ul style="list-style-type: none"> • The TEEM Application is assumed to have access to a fast and reliable database service. • The TEEM application is assumed to have access to a reliable email service for sending notifications to members.
